-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Novak, Jr. et al.

See figure 1 and column 5, line 27 to column 8, line 61.

Claims 14-18 and 22 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Rowland et al ('115).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-13 and 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Novak, Jr. et al in combination with Rowland et al ('115). Novak, Jr. et al teach a device such as claimed except the markedly different marks and the circumferential marks. Rowland et al ('115) teach a device as claimed except putting the marks on an optical fiber per se and the use of discontinuous circumferential marks. It would have been obvious to the artisan of ordinary skill to include the circumferential markings that are markedly different from each other as the markings on the fiber of Novak, Jr. et al, since the will enable distance determination as taught by Rowland et al ('115) or, alternatively, to employ a fiber in the device of Rowland et al, and in

either case to provide the various forms of discontinuous markings, since these are not critical and provides no unexpected result, the producing a device such as claimed.
